

Product Data Sheet

Item Number: ENP IE2135

Item Name: 21"x35" Blankets, Imbiber Beads®, 2 Per Case, White

IMBIBER BEADS® IMBICATOR®

THE WORLD'S ONLY ENGINEERED ABSORBENT POLYMER FOR HAZARDOUS CHEMICAL SPILLS.

Polypropylene, kitty litter, and solidification agents move over! Imbiber Beads® simply work better. They “capture and contain” a broad range of liquid organics including gasoline, diesel and jet fuels, transformer oils, chlorinated solvents, and many more hazardous chemicals. Imbiber Beads® eliminate “free liquids” and the secondary contamination associated with surface-coating sorbents such as polypropylene and kitty litter.

Imbiber Beads® also “blow away” the competition in another critical area. The elimination of free liquids means up to 99% vapor reduction and up to 600% reduction in the rate of volatile vapor release over polypropylene. It is the vapors that support combustion and the vapors that are toxic when inhaled!

This volume of Imbiber Beads®
...will pick up this volume of gasoline

...and swell to a bead

Imbiber Beads® are the ONLY color-change-indicating product on the market.

They change from white, to pink, to red...

...As the concentration of organic liquid increases. They're unaffected by water!

IMBIBER BEADS® IMBICATOR®
