

Twin Rust Preventative 118-H

RUST INHIBITOR AND PREVENTATIVE

TWIN RUST PREVENTATIVE 118-H

Twin Rust Preventative 118-H is a low-viscosity rust and corrosion preventative that is formulated with a slowly evaporating solvent that has a high safety factor. Once the solvent carrier has evaporated, the water-displacing protective film is dry-to-the-touch and effectively neutralizes fingerprints.

Twin Rust Preventative 118-H has obtained approvals from Ford Motor Company, General Motors, Caterpillar, and Cummins Engine Company. The Ford Specification Number for this formulation is WSK-M7C80-A.

OPERATIONAL DATA

All Operations	Use as Received
Humidity Cabinet Performance (ASTM D1748)	48 Days
Salt Spray Resistance (ASTM B117)	36 Hours

Note: Twin Rust Preventative 118-H should be used as received and may be applied with dip-, spray- and/or brush-type mechanical equipment. When dipping wet parts, several minutes of full submergence should be allotted, to allow for complete water displacement. The durations of protection noted above are typical for most operations and are for example only.

TYPICAL PHYSICAL PROPERTIES

Appearance	Amber, Oily Liquid
Specific Gravity, 60°F	0.80
Bulk Density (lbs/gal)	6.67
Viscosity, SUS, 100°F	28 - 36
Flash Point, COC	140°F, min.

FEATURES AND BENEFITS

- Highly Refined Corrosion Inhibitor
- High Performance Blend
- Water-Displacing Formulation
- Effectively Neutralizes Fingerprints
- Thin, Virtually Colorless Film
- Excellent Corrosion Protection for Long Periods of Indoor Storage
