TWIN KUT 20

TWIN KUT 20 is a specially blended cutting and grinding oil for use in the glass and lens industries. It is fortified with an additive package that promotes excellent cooling and lubricity. The ultra-light viscosity of TWIN KUT 20 provides excellent flow onto the cutting surface to insure excellent finishes on the workpiece.

PHYSICAL PROPERTIES:

|                                        |              |
|----------------------------------------|--------------|
| SUS Viscosity @ 100 F .....            | 60-65        |
| Flash Point F .....                    | 315          |
| Color .....                            | Light Yellow |
| Specific Gravity .....                 | .876         |
| Pounds Per Gallon .....                | 7.30         |
| Total Extreme Pressure Additives ..... | 5.1%         |
